

INCIDENT MANAGEMENT SITUATION REPORT
SUNDAY JUNE 15, 2003 - 0800 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationally with 61 new fires reported. One new large fire was reported in the Southwest Area. One large fire was contained in the Eastern Great Basin Area. Very high to extreme fire indices were reported in Alaska, Arizona, Colorado, Nevada, New Mexico, Oklahoma, and Texas.

SOUTHWEST AREA LARGE FIRES:

THOMAS, Apache-Sitgreaves National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is in mixed conifer and pine forest, aspen and live oak woodland, 16 miles south of Alpine, AZ. Active fire behavior was observed. Steep, rugged, inaccessible terrain and heavy fuel loading are hampering suppression efforts. Crews constructed fireline along the southeast perimeter and successfully suppressed slopovers on the south flank. Personnel are using Minimum Impact Suppression Techniques (MIST) in primitive areas.

DRY LAKES COMPLEX, Gila National Forest. A transfer of command from Rath's Fire Use Management Team to Goheen's Fire Use Management Team is planned on June 16th. This lightning caused Wildland Fire Use complex, comprised of the Dry, Lake, Sycamore and Moonshine fires, is 27 miles northwest of Silver City, NM. The complex is being managed to accomplish resource objectives. Moderate fire behavior was observed in pinyon pine, ponderosa pine, grass and mixed stands of conifer with heavy fuel loading. Personnel continue to monitor the complex and support other incidents on the forest.

MORMON, Coconino National Forest. This fire is in pinyon pine, 19 miles southeast of Flagstaff, AZ. The fire is being managed with a confinement strategy. No new information was reported. This will be the last report unless new information is received.

TEN COW, Gila National Forest. This lightning caused Wildland Fire Use fire is in ponderosa pine, pinyon pine, juniper and grass, 32 miles southeast of Reserve, NM. Resources are suppressing spot fires and monitoring fire spread. No new information was reported.

JUNIPER, Prescott National Forest. This lightning caused Wildland Fire Use fire is 40 miles northwest of Prescott, AZ. Creeping and occasional single tree torching were observed in ponderosa pine. No new information was reported.

PICACHO RESERVOIR, State of Arizona. This fire is burning in grass and brush eight miles north of Picacho, AZ. Moderate fire behavior was observed. Continued burn out operations and monitoring are planned.

RIVER, Colorado River Agency, Bureau of Indian Affairs. This human caused fire is in mesquite, salt cedar and arrow weed, ten miles southwest of Bullhead City, AZ. Resources continue to mop up and monitor unburned islands within the fire perimeter.

MORGAN, Gila National Forest. This lightning caused fire is in the Aldo Leopold Wilderness Area, 34 miles west of Truth or Consequences, NM. The fire is burning in ponderosa pine, grass and mixed conifer with heavy dead and down fuels. Smokejumpers and a crew completed handline construction from Diamond Creek to Diamond Peak along the Doubtful Canyon Trail. Burnout operations are underway along the east side of the Continental Divide Trail.

OUTLOOK:

Weather Discussion: High pressure will continue over the West for warm, dry weather except for a few thunderstorms over the Great Basin and Rocky Mountain areas. Showers are expected over the Southeast and New England states. In Alaska, high pressure continues over the interior but moisture will be gradually increasing over the area.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
EASTERN GREAT BASIN AREA Partly cloudy. Isolated thunderstorms in the northern Utah mountains.	75 to 102 lower elevations, 62 to 90 mountains.	4 to 15 % valleys, 15 to 30 % mountains.	West 5-15 mph Idaho/Wyoming; southwest to south 10-20 mph Utah/AZ Strip.
NORTHERN CALIFORNIA AREA Isolated areas of low clouds and fog near the coast in the morning, clearing by late morning. Otherwise sunny, except cumulus buildups over the northwest mountains in the afternoon.	From upper 50s to around 70 near the coast and higher elevations, and 80s to low 90s inland valleys.	12 to 22% driest inland areas (Eastside PSA) and 50% or higher near the coast.	Southwest to northwest, increasing to 5-10 mph in the afternoon. Local gusts to 20 mph, mainly along and east of the Cascade-Sierra crest.
ROCKY MOUNTAIN AREA A few afternoon thunderstorms east, mainly dry west.	80s except up to the mid 90s western Colorado.	10%-20% in western Colorado into north-central Wyoming, with 25%-38% elsewhere.	Variable at 5 to 15 mph.
SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog into the coastal valleys, otherwise mostly sunny.	75-95 mountains and valleys, 90-100 Upper deserts and 100-110 lower deserts.	10-30% mountains, 25-40% valleys, 5-15% deserts.	Southwest to northwest 10-20 mph mountains and deserts, otherwise 5-15 mph.
SOUTHWEST AREA Sunny west and partly to mostly cloudy east. Scattered thunderstorms eastern NM and west TX, with isolated dry thunderstorms possible central and western NM.	70s and 80s mountains and 80s and 90s lower elevations, except near 107 southwest AZ deserts.	5-15% west, 20-35%+ east.	East to southeast 10-15 mph in eastern NM and west TX, upslope/upvalley 5 to 15 mph with some higher afternoon gusts elsewhere.
WESTERN GREAT BASIN AREA High pressure over Nevada will keep temperatures warmer than normal and winds moderate. A weak disturbance passing through the high will cause afternoon thunderstorms in the Sierra Front and northeastern Nevada.	North: 80s to low 90s. South: mid 80s to 100.	Lower elevations: 10-20% Higher elevations: 15 -25%	North: Southwest to Northwest 15-25 mph South: South to Southwest 5-10 mph
